

ELECTRICAL SERVICES

POWERING SUCCESS

Electrical enclosures are found in virtually every industrial or commercial space. As the distribution centres for all the electrical requirements of your business, these enclosures must perform tirelessly day in, day out. The quality of components and assembly must be of the highest standard and are fundamental to the design. Auto Control Systems, in both manufacture and installation, will provide you a solution that out-classes the competition.

A strong history of quality design, service and components has enabled Auto Control Systems to continue development of our technical electrical services, allowing us to undertake projects whose size and complexity are daunting for many other companies. Understanding and communicating the details of your project are of paramount importance and every care is taken to properly define the needs and outcomes of the work.

Being a full-service electrical contractor, we provide quality electrical services covering new installations, maintenance

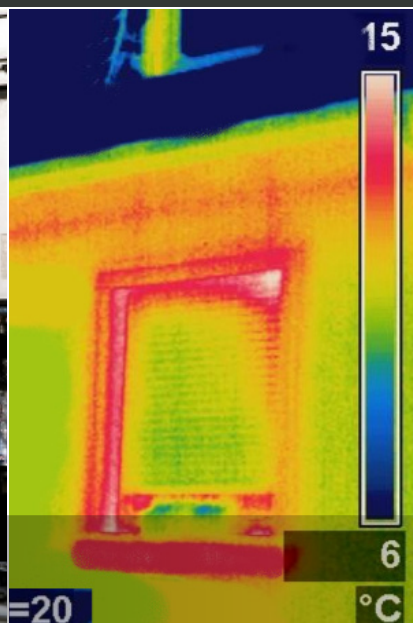

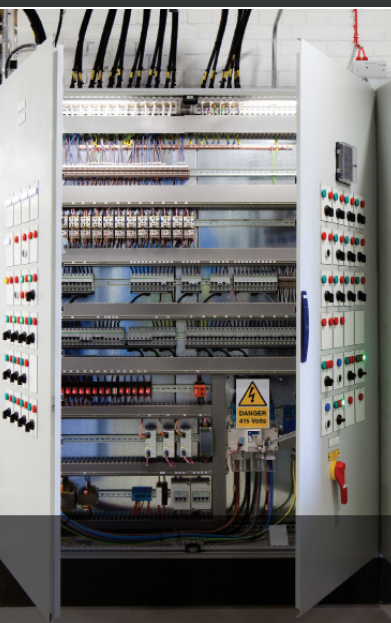

and 24/7 emergency backups to industrial, and commercial business in Perth, Western Australia. From a simple electrical wall socket to the planning, installation and commissioning of a state-of-the-art high-rise or manufacturing plant, our licensed electrical team is dedicated to working with you to implement a solution that meets your needs.

Our work is our legacy so we don't compromise on anything we do - our project history and returning client base is proof of our commitment to being the best. Our values of quality,

safety, reliability, and business integrity underpin everything we do.

Our high standards in delivering quality projects on-time and enhanced value to our clients has led to us to enjoying long-term relationships with key players in a wide range of industries including the retail, commercial, hospitality, education, medical, resources and transport industries.

We have also established strong alliances with global leaders in electrical products that expand our service offering and enable us

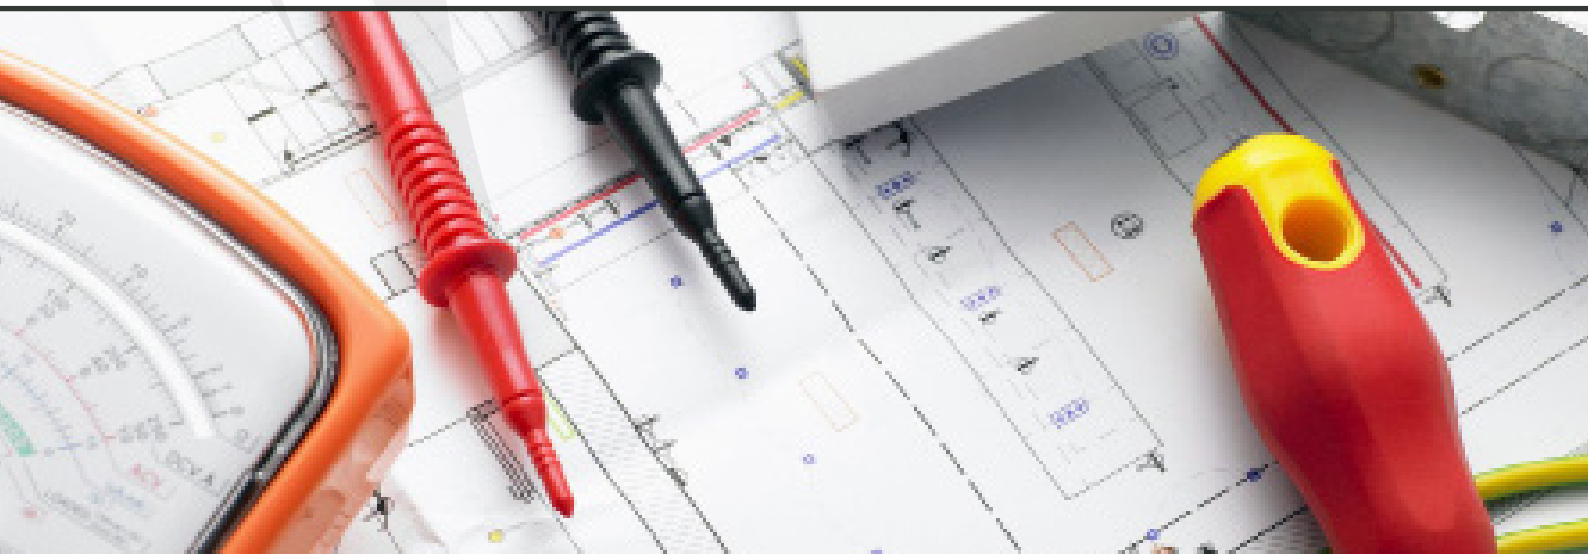

to assist with all aspects of a project from design, through to construction and commissioning. Auto Control Systems qualified electricians have a wide range of expertise encompassing many disciplines including:

- KNX building automation
- Commercial lighting and power installations
- Manufacturing process control
- Safety system design & installation
- Computer/server room power installations
- Lightning protection
- Tenancy refurbishments
- Industrial installations including motorized control systems
- Power factor evaluation & correction
- Uninterruptible power supplies (UPS)
- Generator & backup systems
- Process control systems
- Electrical design & construction
- Switchboard and metering alterations
- Power cabling reticulation (under 1000v, including specially installed underground conduits)
- General commercial servicing and maintenance

Through the implementation of both internal and external training programs and extensive industry experience, Auto Control Systems guarantees the quality of all its work. We adhere to Australian and international standards giving you reliability, and commitment to quality.

With experience across a broad range of industries, Auto Control Systems is well positioned to provide the experience and understanding you require for your business. We make it a priority to listen to our customers, giving them the best of our knowledge and expertise. The outcome of each project we undertake is the best example of the quality of our work and the professional attitude we maintain.
